

THE CYBERPOWER DEMO PROGRAM

TECHNOLOGY, PERFORMANCE & CRAFTSMANSHIP

CyberPower designs and manufactures precision engineered UPS systems, power distribution units (PDUs), surge protection equipment, and power accessories for enterprise, small- and medium sized business and home/office applications. Satisfying the growing power protection and power distribution needs of companies and individuals has helped CyberPower achieve worldwide success.

CyberPower has an award-winning engineering team that meticulously designs and engineers every product to provide outstanding performance as well as surpass international safety and environmental standards. Company owned factories produce each product to exact specifications for complete customer satisfaction.

CyberPower leads the industry by offering over 125 energy-saving UPS systems (350VA - 10kVA).

CyberPower offers Cisco® compatible UPS systems, PDUs and management cards that work within Cisco EnergyWise™ environments.

TRYING CYBERPOWER HAS NEVER BEEN EASIER!

- Choose any qualified CyberPower UPS system (3kVA and under) or PDU.
- Contact your Sales Representative to be officially qualified for the Demo program.
- Once qualified, CyberPower will ship the selected product direct to you.
- You can test and evaluate the product for up to **30** days.
- After 30 days, you can purchase product at 50% off MSRP or you can send it back to CyberPower at no cost.
