

For a limited time, purchase any HP EliteBook Folio 9470m Ultrabook™ with Dragon Professional speech recognition software for an amazing low price.

Busy professionals and their customers require new levels of efficiency and productivity that not only strengthen organizational initiatives, but also lower costs. To meet this challenge head-on, SHI is offering Dragon Professional on all HP EliteBook Folio 9470m series Ultrabooks at a savings of almost 30%* starting March 1st through June 30th.

Meet your productivity needs and maximize the benefits to your organization

With Dragon, you can dictate documents three times faster than typing and use simple voice commands to control your PC desktop and applications entirely by voice. And since the EliteBook Folio 9470m is powered by the 3rd gen Intel® Core™ processor and it is HP's thinnest laptop featuring enterprise-level docking, uncompromised manageability and security paired with full serviceability and customization – it's no wonder the EliteBook Folio 9470m is the first enterprise-class Ultrabook.

Stay productive – even on the go

HP's EliteBook Folio 9470m Ultrabook inspired by Intel provides flexible connectivity options and long all day use battery life, keeping you on the go when needed. You can access the Internet, corporate networks and email in more places around the world with optional HP Mobile Broadband featuring 3G and 4G LTE. No more carrying all the additional accessories – smart card reader, USB dock, VGA and RJ45 dongles – the EliteBook Folio 9470m Ultrabook features them all. And with Dragon still at your fingertips, taking notes in the field is a breeze.

Priced right to compete

From now until June 30th, purchase any HP EliteBook Folio 9470m Ultrabook series and Dragon Professional speech recognition software for an amazing price - a savings of almost 30%* - this deal can't be beat.

HP ELITEBOOK SERIES

Designed from the ground up for business users, the HP EliteBook Folio 9470m Ultrabook combines the sleek, lightweight design users crave with the business features and reliability IT demands. Measuring 19 millimeters thin and weighing in at just over 3.5 pounds, this 14-inch diagonal Ultrabook offers enterprise-class docking capabilities and security features, and it has instant on and is always connected.

In addition to a full array of ports and connectivity options for built-in 4G wireless WAN, Ethernet, VGA, DisplayPort and USB 3.0, the Ultrabook offers the option for a secondary battery that provides extended run time. The HP EliteBook Folio features long life cycles and stable, consistent images, making it easy to buy and deploy. The Ultrabook is also available in consistent global configurations that allow for product standardization in up to 151 countries as a part of the HP Global Series Program.

DRAGON PROFESSIONAL SPEECH RECOGNITION SOFTWARE

Dragon is used by busy professionals and organizations around the world to speed documentation creation and turnaround without changing current business processes, existing applications, or deployed information systems. It's a proven, effective way to increase productivity and job satisfaction for improved customer service and lower employee turnover. The typical Dragon user finds:

- It's accurate. With recognition accuracy rates of up to 99%, Dragon allows users to quickly create detailed and accurate reports without any spelling errors.
- It's fast. Macros automate and streamline repetitive manual processes for productivity increases of up to 300 percent.
- It's efficient. With Dragon users can reduce key strokes and mouse clicks – for example a recent study revealed a greater than 60% reduction in keystrokes and mouse use, leading to greater productivity and a reduction in repetitive stress injuries.

** Pricing will vary based on final HP EliteBook Folio Ultrabook model. Please contact your SHI sales representative for more information.*
